

# PROVIDENCE COLLEGE

## Saint Dominic Chapel

### PROJECT OVERVIEW

Inspired by Dominican history and old-world design, Saint Dominic Chapel at Providence College is a unique architectural gem at the center of campus. Building on a long-standing partnership, Arden Engineering was selected to manage the design, installation, and ongoing maintenance of fire protection systems in this beloved building.

### PROJECT SPECIFICATIONS

Contract Amount: \$150,000

Facility Type: Education

Facility Size: 110,000 square feet

Schedule: Completed July 2001

Location: Providence, RI

### SERVICES PROVIDED

Design-Build  
Fire Protection  
Plumbing  
Facilities Services

### HIGHLIGHTS/ ACHIEVEMENTS

"All wet" systems with water  
in pipes 100% of the time

Heat activation features

Fast-track schedule to meet  
academic calendar

Maintained student safety  
and ensured minimal  
disruption to ongoing  
operations surrounding site

### VALUE DELIVERED

Arden carefully designed and installed fire protection systems to ensure they were unobtrusive in every way. By creating casting to run around piping and alongside beams and joists, the team implemented an artful solution to maintain the Saint Dominic Chapel's interior aesthetic.
