

CERVALIS DATA STORAGE

Connecticut Data Center

PROJECT OVERVIEW

At this 30,000-square-foot facility, Cervalis provides off-site collocation, managed hosting, business continuity, and rapid-recovery services for their clients on a 24 x 365 basis. The mechanical infrastructure installed by MJ Daly called for a high-performance cooling system with multiple redundancies. The project included multiple rooftop condensing units, working with CRAC units, providing high-density cooling in the data areas.

PROJECT SPECIFICATIONS

Contract Amount: \$3,938,000

Facility Type: Data Center/Industrial

Facility Size: 30,000 square feet
