### SERVICES PROVIDED

New Construction  
Process/Utility Piping  
Fabrication

### HIGHLIGHTS/ ACHIEVEMENTS

Fast-track schedule with 33 months between conception and completion

Off-site piping prefabrication for entire project

Carefully phased installation to tie into existing systems

Minimal disruption to plant's 24/7 operating hours

### VALUE DELIVERED

Arden was able to meet demanding deadlines by prefabricating all piping in house. Our team worked extended hours during the installation and commissioning phases to shave additional time off of the already fast-track schedule. Due in part to these efforts, the project was completed nearly three months ahead of schedule.
